### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent No. 5,890,014 to Long.

With respect to claims 1 and 6, Long discloses a method for measuring system performance in a mass storage system, the storage system having a plurality of disk drive storage elements controlled by a disk drive controller, the controller receiving commands and data from and returning at least data to a plurality of host computers, the method comprising the steps of: enabling a graphical user interface for generating an input parameter containing sequence input to commands for operating the system for measuring system performance (see col. 20, lines 1-37 and col. 24, lines 27-45); generating from the input parameter sequence a test sequence a test sequence input identifying commands to be send to the storage system (see col. 9, lines 8-50 and col. 14, lines 8-35); executing at least one host computer a test request identified by the test sequence input, by sending commands to the mass storage system and accumulating, at least the executing host computer, data regarding performance of the mass storage system, in response to

the requests sent by the host computer (see col. 9, lines 25-50 and col. 15, lines 40-57); and processing the accumulated data regarding the performance of the mass storage system in response at least to one host-generated command (see col. 7, line 15 to col. 8, line 17 and col. 20, line 1 to col. 22, line 20).

As to claims 2 and 3, Long also discloses generating configuration data at the graphical user interface (see col. 24, lines 27-45).

As to claim 4, Long also discloses selecting, using the graphical user interface, from various test types for the input sequence of commands, in point and click fashion (see col. 20, lines 1-16).

As to claim 5, Long also discloses defining a system configuration, test periods, and sequence of test repeats (see col. 14, line 59 to col. 15, line 3).

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
